JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 31, No. 6, November-December 1994

1994 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 1130–1135, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 1136, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index.The Chronological Index, pages 1137–1143, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1994, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Aerodynamic Design of Pegasus: Concept to Flight with Computational Fluid Dynamics **A94-157**
Supersonic Axisymmetric Conical Flow Solutions for Different Ratios of Specific Heats **A94-142**
An Improved Version of the Naval Surface Warfare Center Aeroprediction Code (AP93) **A94-119**
Base Drag Prediction on Missile Configurations **A94-115**
Aerodynamic Characteristics of a Hypersonic Viscous Optimized Waverider at High Altitudes **A94-110**
Jimsphere and Radar Wind Profiler Turbulence Indicators **A94-101**
Shuttle Upper Atmosphere Mass Spectrometer Experimental Flight Results **A94-085**
Rarefield-Flow Shuttle Aerodynamics Flight Model **A94-083**
Aerodynamic Characteristics of the Magellan Spacecraft in the Venus Upper Atmosphere **A94-081**
Minimum-Drag Axisymmetric Bodies in the Supersonic/Hypersonic Flow Regimes **A94-059**
Development of an Efficient Inverse Method for Supersonic and Hypersonic Body Design **A94-058**
Aerodynamically Blunt and Sharp Bodies **A94-055**
Navier-Stokes Simulations of Orbiter Aerodynamic Characteristics Including Pitch Trim and Bodyflap **A94-053**
Effects of Gas Models on Hypersonic Base Flow Calculations **A94-032**
Determination of Slender Body Aerodynamics Using Discrete Vortex Methods **A94-029**
Effects of the Roll Angle on Cruciform Wing-Body Configurations at High Incidences **A94-016**

Aerospace Plane

Integrated Inlets for Cone-Derived Waveriders with Combined Transverse and Longitudinal Curvature **A94-091**

Civil Missions and Transportation

Technology and Staging Effects on Two-Stage-to-Orbit Systems **A94-004**

Configuration Design

Integrated Inlets for Cone-Derived Waveriders with Combined Transverse and Longitudinal Curvature **A94-091**
Minimum-Drag Axisymmetric Bodies in the Supersonic/Hypersonic Flow Regimes **A94-059**
Development of an Efficient Inverse Method for Supersonic and Hypersonic Body Design **A94-058**
Navier-Stokes Computation of a Viscous Optimized Waverider **A94-056**
Technology and Staging Effects on Two-Stage-to-Orbit Systems **A94-004**

Flight Mechanics

Analytical Solution for Controls, Heats, and States of Flight Trajectories **A94-145**
An Improved Version of the Naval Surface Warfare Center Aeroprediction Code (AP93) **A94-119**
Base Drag Prediction on Missile Configurations **A94-115**
Applications of Computational Fluid Dynamics to the Aerodynamics of Army Projectiles **A94-028**

Safety

First-Order Reliability Application and Verification Methods for Semistatic Structures **A94-163**

Simulation

Aerodynamic Characteristics of a Hypersonic Viscous Optimized Waverider at High Altitudes **A94-110**
Monte Carlo Simulation for Backscatter of Outgassing Molecules from Simple Spacecraft Surfaces **A94-097**
Aerodynamic Characteristics of the Magellan Spacecraft in the Venus Upper Atmosphere **A94-081**

Structural Design (Including Loads)

Application of Probabilistic Analysis and Design Methods in Space Programs **A94-161**

Weather Hazards

Jimsphere and Radar Wind Profiler Turbulence Indicators **A94-101**

Energy

Photovoltaic Power

Computer Experiments on Arcing Processes as Observed in Ground Tests **A94-146**
Arc Mitigation on High Voltage Solar Arrays **A94-102**
Columbus: To Mars with Solar-Electric Propulsion **A94-050**
Electrical Breakdown Currents on Large Spacecraft in Low Earth Orbit **A94-007**

Solar Power

Arc Mitigation on High Voltage Solar Arrays **A94-102**
Electrical Breakdown Currents on Large Spacecraft in Low Earth Orbit **A94-007**

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Hypersonic Convective Heat Transfer over 140-deg Blunt Cones in Different Gases **A94-112**
Basic Aerodynamic and Heat Transfer Studies for Spacecraft Boosters in Prelaunch Conditions **A94-088**
Approximate Method for Calculating Heating Rates on Three-Dimensional Vehicles **A94-052**
Three-Dimensional Numerical Investigation of Gravitational and Solutal Effects in a Cylindrical Cell **A94-044**

Computational Fluid Dynamics

Effect of a Baffle on Slosh Waves Excited by Gravity-Gradient Acceleration in Microgravity **A94-172**
Aerodynamic Design of Pegasus: Concept to Flight with Computational Fluid Dynamics **A94-157**
Direct Simulation Monte Carlo Simulation of the Interaction Between Rarefied Free Jets **A94-150**
Three-Dimensional Structure of a Supersonic Jet Impinging on an Inclined Plate **A94-118**

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Aerodynamic Design of Pegasus: Concept to Flight with Computational Fluid Dynamics **A94-157**
Supersonic Axisymmetric Conical Flow Solutions for Different Ratios of Specific Heats **A94-142**
An Improved Version of the Naval Surface Warfare Center Aeroprediction Code (AP93) **A94-119**
Base Drag Prediction on Missile Configurations **A94-115**
Aerodynamic Characteristics of a Hypersonic Viscous Optimized Waverider at High Altitudes **A94-110**
Jimsphere and Radar Wind Profiler Turbulence Indicators **A94-101**
Shuttle Upper Atmosphere Mass Spectrometer Experimental Flight Results **A94-085**
Rarefield-Flow Shuttle Aerodynamics Flight Model **A94-083**
Aerodynamic Characteristics of the Magellan Spacecraft in the Venus Upper Atmosphere **A94-081**
Minimum-Drag Axisymmetric Bodies in the Supersonic/Hypersonic Flow Regimes **A94-059**
Development of an Efficient Inverse Method for Supersonic and Hypersonic Body Design **A94-058**
Aerodynamically Blunt and Sharp Bodies **A94-055**
Navier-Stokes Simulations of Orbiter Aerodynamic Characteristics Including Pitch Trim and Bodyflap **A94-053**
Effects of Gas Models on Hypersonic Base Flow Calculations **A94-032**
Determination of Slender Body Aerodynamics Using Discrete Vortex Methods **A94-029**
Effects of the Roll Angle on Cruciform Wing-Body Configurations at High Incidences **A94-016**

Aerospace Plane

Integrated Inlets for Cone-Derived Waveriders with Combined Transverse and Longitudinal Curvature **A94-091**

Civil Missions and Transportation

Technology and Staging Effects on Two-Stage-to-Orbit Systems **A94-004**

Configuration Design

Integrated Inlets for Cone-Derived Waveriders with Combined Transverse and Longitudinal Curvature **A94-091**
Minimum-Drag Axisymmetric Bodies in the Supersonic/Hypersonic Flow Regimes **A94-059**
Development of an Efficient Inverse Method for Supersonic and Hypersonic Body Design **A94-058**
Navier-Stokes Computation of a Viscous Optimized Waverider **A94-056**
Technology and Staging Effects on Two-Stage-to-Orbit Systems **A94-004**

Flight Mechanics

Analytical Solution for Controls, Heats, and States of Flight Trajectories **A94-145**
An Improved Version of the Naval Surface Warfare Center Aeroprediction Code (AP93) **A94-119**
Base Drag Prediction on Missile Configurations **A94-115**
Applications of Computational Fluid Dynamics to the Aerodynamics of Army Projectiles **A94-028**

Safety

First-Order Reliability Application and Verification Methods for Semistatic Structures **A94-163**

Simulation

Aerodynamic Characteristics of a Hypersonic Viscous Optimized Waverider at High Altitudes **A94-110**
Monte Carlo Simulation for Backscatter of Outgassing Molecules from Simple Spacecraft Surfaces **A94-097**
Aerodynamic Characteristics of the Magellan Spacecraft in the Venus Upper Atmosphere **A94-081**

Structural Design (Including Loads)

Application of Probabilistic Analysis and Design Methods in Space Programs **A94-161**

Weather Hazards

Jimsphere and Radar Wind Profiler Turbulence Indicators **A94-101**

Energy

Photovoltaic Power

Computer Experiments on Arcing Processes as Observed in Ground Tests **A94-146**
Arc Mitigation on High Voltage Solar Arrays **A94-102**
Columbus: To Mars with Solar-Electric Propulsion **A94-050**
Electrical Breakdown Currents on Large Spacecraft in Low Earth Orbit **A94-007**

Solar Power

Arc Mitigation on High Voltage Solar Arrays **A94-102**
Electrical Breakdown Currents on Large Spacecraft in Low Earth Orbit **A94-007**

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Hypersonic Convective Heat Transfer over 140-deg Blunt Cones in Different Gases **A94-112**
Basic Aerodynamic and Heat Transfer Studies for Spacecraft Boosters in Prelaunch Conditions **A94-088**
Approximate Method for Calculating Heating Rates on Three-Dimensional Vehicles **A94-052**
Three-Dimensional Numerical Investigation of Gravitational and Solutal Effects in a Cylindrical Cell **A94-044**

Computational Fluid Dynamics

Effect of a Baffle on Slosh Waves Excited by Gravity-Gradient Acceleration in Microgravity **A94-172**
Aerodynamic Design of Pegasus: Concept to Flight with Computational Fluid Dynamics **A94-157**
Direct Simulation Monte Carlo Simulation of the Interaction Between Rarefied Free Jets **A94-150**
Three-Dimensional Structure of a Supersonic Jet Impinging on an Inclined Plate **A94-118**

Predicting Exhaust Plume Boundaries with Supersonic External Flows A94-117
Higher-Order Viscous Shock-Layer Solutions for High-Altitude Flows A94-114
Application of the Multigrid Solution Technique to Hypersonic Entry Vehicles A94-113
Computation of Unsteady Flow past an Oscillating Cylinder near a Vertical Wall A94-094
Computation of the Roll Moment for a Projectile with Wrap-Around Fins A94-092
Multiblock Analysis for Shuttle Orbiter Re-entry Heating from Mach 24 to Mach 12 A94-054
Particle Simulations of Helium Microthruster Flows A94-039
Calculations of Low-Reynolds-Number Resistojet Nozzles A94-037
Effects of Gas Models on Hypersonic Base Flow Calculations A94-032
Navier-Stokes Solver for Hypersonic Flow over a Slender Cone A94-031
Applications of Computational Fluid Dynamics to the Aerodynamics of Army Projectiles A94-028
Three-Dimensional Flow Calculations for a Projectile with Standard and Dome Bases A94-015
Drag Reduction for Turbulent Flow over a Projectile: Part I A94-012
Drag Reduction for Turbulent Flow over a Projectile: Part II A94-013
Characteristics of the Shuttle Orbiter Leeside Flow During a Re-Entry Condition A94-001

Hypersonic Flow

Zonally Decoupled Direct Simulation Monte Carlo Solutions of Hypersonic Blunt-Body Wake Flows A94-152
Near-Wake Structure for a Generic Configuration of Aeroassisted Space Transfer Vehicles A94-149
Higher-Order Viscous Shock-Layer Solutions for High-Altitude Flows A94-114
Application of the Multigrid Solution Technique to Hypersonic Entry Vehicles A94-113
Hypersonic Convective Heat Transfer over 140-deg Blunt Cones in Different Gases A94-112
Overview of Technical Challenges of Re-Entry Analysis of Radioisotope Heat Sources A94-095
Approximate Viscous Shock Layer Technique for Calculating Hypersonic Flows About Blunt-Nosed Bodies A94-093
Integrated Inlets for Cone-Derived Waveriders with Combined Transverse and Longitudinal Curvature A94-091
Hypersonic Interceptor Aero-Optics Performance Predictions A94-089
Shuttle Upper Atmosphere Mass Spectrometer Experimental Flight Results A94-085
Rarefield-Flow Shuttle Aerodynamics Flight Model A94-083
Cercignani-Lampis-Lord Gas-Surface Interaction Model: Comparisons Between Theory and Simulation A94-080
Hypersonic Waverider Test Vehicle: A Logical Next Step A94-057
Navier-Stokes Computation of a Viscous Optimized Waverider A94-056
Multiblock Analysis for Shuttle Orbiter Re-entry Heating from Mach 24 to Mach 12 A94-054
Navier-Stokes Simulations of Orbiter Aerodynamic Characteristics Including Pitch Trim and Bodyflap A94-053
Hypersonic Fin Aerodynamics A94-049
Effects of Gas Models on Hypersonic Base Flow Calculations A94-032
Navier-Stokes Solver for Hypersonic Flow over a Slender Cone A94-031
Engineering Code for Hypersonic Vehicle Optimization A94-021
Monte Carlo Simulation of a Near-Continuum Shock-Shock Interaction Problem A94-003
Characteristics of the Shuttle Orbiter Leeside Flow During a Re-Entry Condition A94-001

Inlet, Nozzle, Diffuser, and Channel Flows

Predicting Exhaust Plume Boundaries with Supersonic External Flows A94-117
Calculations of Low-Reynolds-Number Resistojet Nozzles A94-037
Supersonic Flow in the Second-Throat Ejector-Diffuser System A94-017

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Supersonic Near-Wake Afterbody Boattailing Effects on Axisymmetric Bodies A94-159
Direct Simulation Monte Carlo Simulation of the Interaction Between Rarefied Free Jets A94-150
An Improved Version of the Naval Surface Warfare Center Aeroprediction Code (AP93) A94-119
Three-Dimensional Structure of a Supersonic Jet Impinging on an Inclined Plate A94-118
Hypersonic Rarefied Flow past Spheres Including Wake Structure A94-109
Hypersonic Interceptor Aero-Optics Performance Predictions A94-089
Measurements of Jet-Induced Pressure Decay in a Thermally Stratified Tank A94-042

Multiphase Flows

Fluid Dynamics Within a Rotating Bioreactor in Space and Earth Environments A94-147

Plasmadynamics and MHD

Multibody-Plasma Interactions: Charging in the Wake A94-134

Rarefied Flows

Simulated Rarefied Aerodynamics of the Magellan Spacecraft During Aerobraking A94-153
Zonally Decoupled Direct Simulation Monte Carlo Solutions of Hypersonic Blunt-Body Wake Flows A94-152
Determination of Wall Boundary Conditions for High-Speed-Ratio Direct Simulation Monte Carlo Calculations A94-151
Direct Simulation Monte Carlo Simulation of the Interaction Between Rarefied Free Jets A94-150
Near-Wake Structure for a Generic Configuration of Aeroassisted Space Transfer Vehicles A94-149
Aerodynamic Characteristics of a Hypersonic Viscous Optimized Waverider at High Altitudes A94-110
Hypersonic Rarefied Flow past Spheres Including Wake Structure A94-109
Monte Carlo Simulation for Backscatter of Outgassing Molecules from Simple Spacecraft Surfaces A94-097
Shuttle Upper Atmosphere Mass Spectrometer Experimental Flight Results A94-085
Rarefield-Flow Shuttle Aerodynamics Flight Model A94-083
Aerodynamic Characteristics of the Magellan Spacecraft in the Venus Upper Atmosphere A94-081
Cercignani-Lampis-Lord Gas-Surface Interaction Model: Comparisons Between Theory and Simulation A94-080
Lip Leakage Flow Simulation for the Gravity Probe B Gas Spinup A94-062
Particle Simulations of Helium Microthruster Flows A94-039
Simplified Model for Calculation of Backflow Contamination from Rocket Exhausts in Vacuum A94-038
NASP Vehicle Interactions and Signatures above 100 Kilometers A94-033
Monte Carlo Simulation of a Near-Continuum Shock-Shock Interaction Problem A94-003

Reacting Flows and Combustion

Hypersonic Convective Heat Transfer over 140-deg Blunt Cones in Different Gases A94-112

Separated Flows

Investigation of the Flow past the ARIANE 5 Launcher Afterbody A94-030
Three-Dimensional Flow Calculations for a Projectile with Standard and Dome Bases A94-015
Supersonic Near-Wake Afterbody Boattailing Effects on Axisymmetric Bodies A94-159
Some Aspects of the Aerodynamics of Separating Strap-ons A94-158
Wing Vertical Position Effects on Wing-Body Carryover for Noncircular Missiles A94-156

Supersonic Flow

Supersonic Axisymmetric Conical Flow Solutions for Different Ratios of Specific Heats A94-142
Gasdynamic Approach to Small Plumes Computation A94-103
Euler and Navier-Stokes Solutions for Supersonic Flow Around a Complex Missile A94-090
Minimum-Drag Axisymmetric Bodies in the Supersonic/Hypersonic Flow Regimes A94-059
Development of an Efficient Inverse Method for Supersonic and Hypersonic Body Design A94-058
Aerodynamically Blunt and Sharp Bodies A94-055
Investigation of the Flow past the ARIANE 5 Launcher Afterbody A94-030
Supersonic Flow in the Second-Throat Ejector-Diffuser System A94-017

Transonic Flow

Three-Dimensional Flow Calculations for a Projectile with Standard and Dome Bases A94-015
Drag Reduction for Turbulent Flow over a Projectile: Part I A94-012
Drag Reduction for Turbulent Flow over a Projectile: Part II A94-013

Unsteady Flows

Computation of Unsteady Flow past an Oscillating Cylinder near a Vertical Wall A94-094

Viscous Non-Boundary-Layer Flows

Fluid Dynamics Within a Rotating Bioreactor in Space and Earth Environments A94-147
Higher-Order Viscous Shock-Layer Solutions for High-Altitude Flows A94-114

Vortices

Near-Wake Structure for a Generic Configuration of Aeroassisted Space Transfer Vehicles A94-149
Wing Effects on Missile Asymmetric Vortex Behavior A94-106
Euler and Navier-Stokes Solutions for Supersonic Flow Around a Complex Missile A94-090

Wave Motion and Sloshing

Effect of a Baffle on Slosh Waves Excited by Gravity-Gradient Acceleration in Microgravity **A94-172**

Guidance, Control, and Dynamics Technology

Aircraft Stability and Control

Control Strategies for Space Boosters Using Air Collection Systems **A94-035**

Artificial Intelligence

Space Shuttle Main Engine Sensor Modeling Using Radial-Basis-Function Neural Networks **A94-164**

Astrodynamics

Formulas for the Phase Characteristics in the Problem of Low-Earth-Orbital Debris **A94-162**

Perturbed Volume of Orbiting Debris **A94-077**

Modeling Radiation Forces Acting on Topex/Poseidon for Precision Orbit Determination **A94-014**

Estimation of the Low-Earth-Orbit Debris Population and Distribution **A94-006**

Control System Design

Mechanism Synthesis and Two-Dimensional Control Designs of an Active Three-Cable Crane **A94-019**

Dynamics

Dynamics of a Space Module Impacting Water **A94-074**

Flight Displays

Effects of Space Exposure on Pyroelectric Infrared Detectors **A94-104**

Flight Mechanics

Analytical Solution for Controls, Heats, and States of Flight Trajectories **A94-145**

Functional Dependence of Trajectory Dispersion on Inital Condition Errors **A94-122**

Information Processing

Bandwidth Compression of the Digitized High-Definition Television Images for Transmission via Satellites **A94-010**

Launch Vehicle Dynamics

Some Aspects of the Aerodynamics of Separating Strap-ons **A94-158**

Missile Dynamics

Wing Vertical Position Effects on Wing-Body Carryover for Noncircular Missiles **A94-156**

Simplified Method for Evaluating the Flight Stability of Liquid-Filled Projectiles **A94-018**

Navigation

Imaging Penetrator-Beacon Design for Mars **A94-174**

Precision Landing on Mars Using Imaging Penetrator Beacons **A94-169**

Optimization Techniques

Rocket-Powered Single-Stage Vehicle Configuration Selection and Design **A94-120**

Engineering Code for Hypersonic Vehicle Optimization **A94-021**

Signal Processing

Shape of Space Debris as Estimated from Radar Cross Section Variations **A94-099**

Bandwidth Compression of the Digitized High-Definition Television Images for Transmission via Satellites **A94-010**

Spacecraft Dynamics

Thermal Force Modeling for Global Positioning System Satellites Using the Finite Element Method **A94-129**

Acceleration Mapping on Consort 5 **A94-127**

Improved GPS Solar Radiation Pressure Modeling for Precise Orbit Determination **A94-125**

Perturbed Volume of Orbiting Debris **A94-077**

Modeling Radiation Forces Acting on Topex/Poseidon for Precision Orbit Determination **A94-014**

Spacecraft Guidance and Control

Dynamical Instability of the Aerogravity Assist Maneuver **A94-141**

Solar Pressure Disturbance on GSTAR and SPACENET Satellites **A94-070**

State Estimation

Thermal Force Modeling for Global Positioning System Satellites Using the Finite Element Method **A94-129**

Improved GPS Solar Radiation Pressure Modeling for Precise Orbit Determination **A94-125**

Structural Control

Semiactive Vibration Suppression of Truss Structures by Coulomb Friction **A94-009**

Trajectory Optimization

Control Strategies for Space Boosters Using Air Collection Systems **A94-035**

Interdisciplinary Topics

Aerospace Technology Utilization

Mechanism Synthesis and Two-Dimensional Control Designs of an Active Three-Cable Crane **A94-019**

Analytical and Numerical Methods

TRANSYS—Space Transportation System Preliminary Design Software **A94-166**

Computer Experiments on Arcing Processes as Observed in Ground Tests **A94-146**

Analytical Solution for Controls, Heats, and States of Flight Trajectories **A94-145**

Functional Dependence of Trajectory Dispersion on Inital Condition Errors **A94-122**

Spacecraft Environmental Anomalies Expert System **A94-026**

Atmospheric and Space Sciences

Formulas for the Phase Characteristics in the Problem of Low-Earth-Orbital Debris **A94-162**

Determination of Wall Boundary Conditions for High-Speed-Ratio Direct Simulation Monte Carlo Calculations **A94-151**

Computer Experiments on Arcing Processes as Observed in Ground Tests **A94-146**

Calculating the Number of Meteoroid Impacts onto a Gravity-Gradient-Stabilized Spacecraft **A94-144**

Jimsphere and Radar Wind Profiler Turbulence Indicators **A94-101**

Optical Properties of Orbital Debris **A94-100**

Atomic-Oxygen Undercutting of Long Duration Exposure Facility Aluminized-Kapton Multilayer Insulation **A94-098**

Visual Photometric Experiment: A Getaway Special Payload Aboard STS-042 **A94-087**

Long-Term Variability of Electron Radiation Dose in Geosynchronous Orbit **A94-084**

Intelsat Solar Array Coupon Atomic Oxygen Flight Experiment **A94-069**

Solid Rocket Exhaust in the Stratosphere: Plume Diffusion and Chemical Reactions **A94-063**

On-Line Spacecraft Environment Interactions Information System **A94-027**

Spacecraft Environmental Anomalies Expert System **A94-026**

NASA/National Space Science Data Center Trapped Radiation Models **A94-025**

CAD/CAM

Object-Oriented, Optimization-Based Design of Satellite Structures **A94-045**

Human Factors

Design and Structural Analysis of Highly Mobile Space Suits and Gloves **A94-173**

Physiological Constraints on Deceleration During the Aerocapture of Manned Vehicles **A94-064**

Lasers and Laser Applications

Removal of Orbital Debris from Low Earth Orbit by Laser-Generated Drag **A94-143**

Reliability, Maintainability, and Logistics Support

Safety Index Approach to Predicting the Storage Life of Rocket Motors **A94-167**

First-Order Reliability Application and Verification Methods for Semistatic Structures **A94-163**

Deployment Reliability Prediction for Large Satellite Antennas Driven by Spring Mechanisms **A94-132**

Intelsat Solar Array Coupon Atomic Oxygen Flight Experiment **A94-069**

Probabilistic Progressive Buckling of Trusses **A94-068**

Bayesian Formulation of the Best of Liquid and Solid Reliability Methodology **A94-043**

Reliability Consideration of Thin-Film Temperature Sensors in Future Space Shuttle Propulsion Systems **A94-020**

Research Facilities and Instrumentation

Hypersonic Interceptor Aero-Optics Performance Predictions **A94-089**

International Space University Variable Gravity Research Facility Design **A94-048**

Consort 3 Results **A94-005**

Safety

Removal of Orbital Debris from Low Earth Orbit by Laser-Generated Drag **A94-143**

Functional Dependence of Trajectory Dispersion on Inital Condition Errors **A94-122**

Shape of Space Debris as Estimated from Radar Cross Section Variations A94-099

Sensor Systems

Space Shuttle Main Engine Sensor Modeling Using Radial-Basis-Function Neural Networks A94-164
Reliability Consideration of Thin-Film Temperature Sensors in Future Space Shuttle Propulsion Systems A94-020

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Supersonic Near-Wake Afterbody Boattailing Effects on Axisymmetric Bodies A94-159
Aerodynamic Design of Pegasus: Concept to Flight with Computational Fluid Dynamics A94-157
Wing Vertical Position Effects on Wing-Body Carryover for Noncircular Missiles A94-156
Aerodynamic Characteristics of a Canard-Controlled Missile at High Angles of Attack A94-116
Wing Effects on Missile Asymmetric Vortex Behavior A94-106
Computation of the Roll Moment for a Projectile with Wrap-Around Fins A94-092
Euler and Navier-Stokes Solutions for Supersonic Flow Around a Complex Missile A94-090
Basic Aerodynamic and Heat Transfer Studies for Spacecraft Boosters in Prelaunch Conditions A94-088
Hypersonic Fin Aerodynamics A94-049
Investigation of the Flow past the ARIANE 5 Launcher Afterbody A94-030
Effects of the Roll Angle on Cruciform Wing-Body Configurations at High Incidences A94-016

Configuration Design

TRANSYS—Space Transportation System Preliminary Design Software A94-166
Rocket-Powered Single-Stage Vehicle Configuration Selection and Design A94-120
Role of Criteria in Design and Management of Space Systems A94-047
Engineering Code for Hypersonic Vehicle Optimization A94-021
Effects of the Roll Angle on Cruciform Wing-Body Configurations at High Incidences A94-016

Launch Vehicle and Sounding Rocket Systems

Commercial Experiment Transporter—COMET A94-128
Rocket-Powered Single-Stage Vehicle Configuration Selection and Design A94-120
Propulsion Requirements for Reusable Single-Stage-to-Orbit Rocket Vehicles A94-060
Consort 3 Results A94-005

Missile Systems

Nuclear Explosive Propelled Interceptor for Deflecting Objects on Collision Course with Earth A94-107
Computation of Unsteady Flow past an Oscillating Cylinder near a Vertical Wall A94-094

Mission Studies and Economics

Columbus: To Mars with Solar-Electric Propulsion A94-050
Monte Carlo Simulation of Launch Site Winds at Kennedy Space Center A94-036

Propulsion and Propellant Systems

Launch Straregy Using Ground-Based Mass Drivers A94-139
Nuclear Explosive Propelled Interceptor for Deflecting Objects on Collision Course with Earth A94-107
Propulsion Requirements for Reusable Single-Stage-to-Orbit Rocket Vehicles A94-060
Measurements of Jet-Induced Pressure Decay in a Thermally Stratified Tank A94-042
Propellant Stress Relief Groove for the Titan IV Solid Rocket Motor Upgrade A94-041

Simulation

Some Aspects of the Aerodynamics of Separating Strap-ons A94-158
Monte Carlo Simulation of Launch Site Winds at Kennedy Space Center A94-036
Simplified Method for Evaluating the Flight Stability of Liquid-Filled Projectiles A94-018

Structural Design (Including Loads)

Structural and Loads Analysis of a Two-Stage Reusable Manned Launch System A94-124
Examining the Accuracy of Space Shuttle Support Loads Using Probabilistic Analysis Techniques A94-123
Analysis of Multifastener Composite Joints A94-040

Testing, Flight and Ground

Examining the Accuracy of Space Shuttle Support Loads Using Probabilistic Analysis Techniques A94-123
Aerodynamic Characteristics of a Canard-Controlled Missile at High Angles of Attack A94-116

Trajectories and Tracking Systems

Fast Missions to Pluto Using Jupiter Gravity-Assist and Small Launch Vehicles A94-160
Monte Carlo Simulation of Launch Site Winds at Kennedy Space Center A94-036
Simplified Method for Evaluating the Flight Stability of Liquid-Filled Projectiles A94-018

Propulsion

Airbreathing Propulsion

Control Strategies for Space Boosters Using Air Collection Systems A94-035

Electric and Advanced Space Propulsion

Interactions Between the Space Experiments with Particle Accelerators Plasma Contactor and the Ionosphere A94-168
Launch Straregy Using Ground-Based Mass Drivers A94-139
Fourth-Generation Mars Vehicle Concepts A94-126
Columbus: To Mars with Solar-Electric Propulsion A94-050
Calculations of Low-Reynolds-Number Resistojet Nozzles A94-037
Mars Transfer Vehicle Using Regolith as Propellant A94-008

Engine Performance

Lunar Missions Using Advanced Chemical Propulsion: System Design Issues A94-067

Environmental Effects

Solid Rocket Exhaust in the Stratosphere: Plume Diffusion and Chemical Reactions A94-063
NASP Vehicle Interactions and Signatures above 100 Kilometers A94-033

Liquid Rocket Motors and Missile Systems

Propulsion Requirements for Reusable Single-Stage-to-Orbit Rocket Vehicles A94-060
Bayesian Formulation of the Best of Liquid and Solid Reliability Methodology A94-043

Ramjets and Scramjets

Navier-Stokes Computation of a Viscous Optimized Waverider A94-056

Solid Rocket Motors and Missile Systems

Safety Index Approach to Predicting the Storage Life of Rocket Motors A94-167
Solid-Propellant Grain Design by an Interface Reconstruction Scheme A94-137
Commercial Experiment Transporter—COMET A94-128
Solid Rocket Exhaust in the Stratosphere: Plume Diffusion and Chemical Reactions A94-063
Bayesian Formulation of the Best of Liquid and Solid Reliability Methodology A94-043
Propellant Stress Relief Groove for the Titan IV Solid Rocket Motor Upgrade A94-041
Supersonic Flow in the Second-Throat Ejector-Diffuser System A94-017
Probabilistic Crack Growth Model for Application to Composite Solid Propellants A94-011

Space Technology

Aerobraking Configurations /Aerothermodynamics

Simulated Rarefied Aerodynamics of the Magellan Spacecraft During Aerobraking A94-153
Zonally Decoupled Direct Simulation Monte Carlo Solutions of Hypersonic Blunt-Body Wake Flows A94-152
Uranus and Neptune Atmospheric-Entry Probe Study A94-121
Mars Aerocapture: Extension and Refinement A94-105
Aerothermodynamic Methods for a Mars Environmental Survey Mars Entry A94-075
Trajectory-Based Heating Analysis for the European Space Agency/Rosetta Earth Return Vehicle A94-061
Particle Simulation of Rarefied Aeropass Maneuvers of the Magellan Spacecraft A94-002

Aerobraking Flight Mechanics

Simulated Rarefied Aerodynamics of the Magellan Spacecraft During Aerobraking A94-153
Dynamical Instability of the Aerogravity Assist Maneuver A94-141
Mars Aerocapture: Extension and Refinement A94-105
Physiological Constraints on Deceleration During the Aerocapture of Manned Vehicles A94-064

Humans in Space/Life Support Systems, EVA

Design and Structural Analysis of Highly Mobile Space Suits and Gloves A94-173
Neutral Buoyancy Evaluation of Extravehicular

Activity Assembly of a Large Precision Reflector A94-086
Physiological Constraints on Deceleration During the Aerocapture of Manned Vehicles A94-064
Deployed High-Temperature Superconducting Coil Magnetic Shield A94-051
International Space University Variable Gravity Research Facility Design A94-048

Landers

Dynamics of a Space Module Impacting Water A94-074

Mission Design and Analysis

Imaging Penetrator-Beacon Design for Mars A94-174
Precision Landing on Mars Using Imaging Penetrator Beacons A94-169
Formulas for the Phase Characteristics in the Problem of Low-Earth-Orbital Debris A94-162
Fast Missions to Pluto Using Jupiter Gravity-Assist and Small Launch Vehicles A94-160
Fourth-Generation Mars Vehicle Concepts A94-126
Mars Aerocapture: Extension and Refinement A94-105
Long-Term Variability of Electron Radiation Dose in Geosynchronous Orbit A94-084
Abort Options for Potential Mars Missions A94-082
Lunar Missions Using Advanced Chemical Propulsion: System Design Issues A94-067
On-Line Spacecraft Environment Interactions Information System A94-027
Mars Transfer Vehicle Using Regolith as Propellant A94-008

Mission Trajectories (Earth and Interplanetary)

Fast Missions to Pluto Using Jupiter Gravity-Assist and Small Launch Vehicles A94-160
Effects of Satellite Bunching on the Probability of Collision in Geosynchronous Orbit A94-135
Overview of Technical Challenges of Re-Entry Analysis of Radioisotope Heat Sources A94-095
Abort Options for Potential Mars Missions A94-082

Space Experiments

Interactions Between the Space Experiments with Particle Accelerators Plasma Contactor and the Ionosphere A94-168
Fluid Dynamics Within a Rotating Bioreactor in Space and Earth Environments A94-147
Measured Plasma Conductivity of Zinc-Oxide-Based Thermal Control Coatings A94-138
Midcourse Space Experiment: Introduction to the Spacecraft, Instruments, and Scientific Objectives A94-136
Multibody-Plasma Interactions: Charging in the Wake A94-134
Commercial Experiment Transporter—COMET A94-128
Atomic-Oxygen Undercutting of Long Duration Exposure Facility Aluminized-Kapton Multilayer Insulation A94-098
Visual Photometric Experiment: A Getaway Special Payload Aboard STS-042 A94-087
Plasma Chamber Testing of Advanced Photovoltaic Solar Array Coupons A94-079
Foam Fractionation of Particles in Low Gravity A94-046
Three-Dimensional Numerical Investigation of Gravitational and Solutal Effects in a Cylindrical Cell A94-044
NASA/National Space Science Data Center Trapped Radiation Models A94-025

Space Processing

Acceleration Mapping on Consort 5 A94-127
Foam Fractionation of Particles in Low Gravity A94-046

Space Systems

Imaging Penetrator-Beacon Design for Mars A94-174
Determination of Wall Boundary Conditions for High-Speed-Ratio Direct Simulation Monte Carlo Calculations A94-151
Effects of Satellite Bunching on the Probability of Collision in Geosynchronous Orbit A94-135
Multibody-Plasma Interactions: Charging in the Wake A94-134
Effects of 69 Months in Low Earth Orbit on Kapton Antenna Structures A94-130
Managing Single Event Effects in Satellite Systems A94-076
International Space University Variable Gravity Research Facility Design A94-048
Role of Criteria in Design and Management of Space Systems A94-047
Spacecraft Environmental Anomalies Expert System A94-026
National Oceanic and Atmospheric Administration's Spacecraft Anomaly Data Base and Examples of Solar Activity Affecting Spacecraft A94-023
Analysis of Environmentally Induced Spacecraft Anomalies A94-022
Mechanism Synthesis and Two-Dimensional Control Designs of an Active Three-Cable Crane A94-019
Estimation of the Low-Earth-Orbit Debris Population and Distribution A94-006

Spacecraft Attitude Determination

Acceleration Mapping on Consort 5 A94-127
Optical Properties of Orbital Debris A94-100

Spacecraft Communication

Bandwidth Compression of the Digitized High-Definition Television Images for Transmission via Satellites A94-010

Spacecraft Contamination/Sterilization

Monte Carlo Simulation for Backscatter of Outgassing Molecules from Simple Spacecraft Surfaces A94-097
Simplified Model for Calculation of Backflow Contamination from Rocket Exhausts in Vacuum A94-038

Spacecraft Power

Measured Plasma Conductivity of Zinc-Oxide-Based Thermal Control Coatings A94-138
Arc Mitigation on High Voltage Solar Arrays A94-102
Plasma Chamber Testing of Advanced Photovoltaic Solar Array Coupons A94-079
Arcing of Negatively Biased Solar Cells in a Plasma Environment A94-072
National Oceanic and Atmospheric Administration's Spacecraft Anomaly Data Base and Examples of Solar Activity Affecting Spacecraft A94-023

Spacecraft Propulsion System Integration

Effect of a Baffle on Slosh Waves Excited by Gravity-Gradient Acceleration in Microgravity A94-172
Method of Filling Screen Liquid Acquisition Devices in Low Gravity A94-171
Lunar Missions Using Advanced Chemical Propulsion: System Design Issues A94-067
Particle Simulations of Helium Microthruster Flows A94-039

Spacecraft Radiation Protection

Radiation Control with Selectively Reflective Overcoats A94-096
Long-Term Variability of Electron Radiation Dose in Geosynchronous Orbit A94-084
Managing Single Event Effects in Satellite Systems A94-076
Deployed High-Temperature Superconducting Coil Magnetic Shield A94-051
NASA/National Space Science Data Center Trapped Radiation Models A94-025
Anomalies due to Single Event Upsets A94-024
National Oceanic and Atmospheric Administration's Spacecraft Anomaly Data Base and Examples of Solar Activity Affecting Spacecraft A94-023
Analysis of Environmentally Induced Spacecraft Anomalies A94-022
Mars Transfer Vehicle Using Regolith as Propellant A94-008

Spacecraft Sensor Systems

Space Shuttle Main Engine Sensor Modeling Using Radial-Basis-Function Neural Networks A94-164
Midcourse Space Experiment: Introduction to the Spacecraft, Instruments, and Scientific Objectives A94-136
Visual Photometric Experiment: A Getaway Special Payload Aboard STS-042 A94-087
Thermal Modeling of Shuttle Solid Rocket Motors on the Launch Pad A94-034
NASP Vehicle Interactions and Signatures above 100 Kilometers A94-033
Reliability Consideration of Thin-Film Temperature Sensors in Future Space Shuttle Propulsion Systems A94-020

Spacecraft Structural Configuration, Design, and Analysis

Structural Design and Mitigation of Mirror Deformations in Lunar-Based Telescopes A94-170
Fourth-Generation Mars Vehicle Concepts A94-126
Probabilistic Progressive Buckling of Trusses A94-068
Object-Oriented, Optimization-Based Design of Satellite Structures A94-045

Spacecraft Test and Evaluation

TOPEX Microwave Radiometer Thermal Control: Post-System-Test Modifications and On-Orbit Performance A94-165
Deployment Reliability Prediction for Large Satellite Antennas Driven by Spring Mechanisms A94-132
Cadmium Simulation of Orbital-Debris Shield Performance to Scaled Velocities of 18km/s A94-131
Dynamics of a Space Module Impacting Water A94-074
Intelsat Solar Array Coupon Atomic Oxygen Flight Experiment A94-069

Analysis of Environmentally Induced Spacecraft Anomalies A94-022

Spacecraft Thermal Management

Effect of Transverse Vibration on the Performance of a Heat Pipe A94-140
Measured Plasma Conductivity of Zinc-Oxide-Based Thermal Control Coatings A94-138
Radiation Control with Selectively Reflective Overcoats A94-096
Thermal Modeling of Shuttle Solid Rocket Motors on the Launch Pad A94-034

Structural Mechanics and Materials

Flexible and Active Structures

Semiactive Vibration Suppression of Truss Structures by Coulomb Friction A94-009

Materials Structural Properties

Design and Structural Analysis of Highly Mobile Space Suits and Gloves A94-173
Effects of 69 Months in Low Earth Orbit on Kapton Antenna Structures A94-130
Probabilistic Crack Growth Model for Application to Composite Solid Propellants A94-011

Structural Composite Materials

Analysis of Multifastener Composite Joints A94-040

Structural Design

Structural Design and Mitigation of Mirror Deformations in Lunar-Based Telescopes A94-170
First-Order Reliability Application and Verification Methods for Semistatic Structures A94-163
Application of Probabilistic Analysis and Design Methods in Space Programs A94-161
Structural and Loads Analysis of a Two-Stage Reusable Manned Launch System A94-124
Examining the Accuracy of Space Shuttle Support Loads Using Probabilistic Analysis Techniques A94-123
Feasibility Study of Inflatable Structures for a Lunar Base A94-066
Role of Criteria in Design and Management of Space Systems A94-047

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Safety Index Approach to Predicting the Storage Life of Rocket Motors A94-167
Effects of 69 Months in Low Earth Orbit on Kapton Antenna Structures A94-130
Atomic-Oxygen Undercutting of Long Duration Exposure Facility Aluminized-Kapton Multilayer Insulation A94-098
Probabilistic Progressive Buckling of Trusses A94-068
Probabilistic Crack Growth Model for Application to Composite Solid Propellants A94-011

Structural Dynamics and Characterization

Semiactive Vibration Suppression of Truss Structures by Coulomb Friction A94-009

Structural Finite Elements

Analysis of Multifastener Composite Joints A94-040

Structural Modeling

Structural and Loads Analysis of a Two-Stage Reusable Manned Launch System A94-124

Structural Optimization

Application of Probabilistic Analysis and Design Methods in Space Programs A94-161
Object-Oriented, Optimization-Based Design of Satellite Structures A94-045

Thermal Effects

Structural Design and Mitigation of Mirror Deformations in Lunar-Based Telescopes A94-170
Thermal Force Modeling for Global Positioning System Satellites Using the Finite Element Method A94-129

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Thermal Response and Ablation Characteristics of Lightweight Ceramic Ablators A94-155
Hypersonic Nonequilibrium Navier-Stokes Solutions over an Ablating Graphite Nosetip A94-111
Ablation Response Testing of Simulated Radioisotope Power Supplies A94-071
Trajectory-Based Heating Analysis for the European Space Agency/Rosetta Earth Return Vehicle A94-061

Aerothermodynamics/Thermal Protection

Uranus and Neptune Atmospheric-Entry Probe Study A94-121
Hypersonic Nonequilibrium Navier-Stokes Solutions over an Ablating Graphite Nosetip A94-111
Radiation Control with Selectively Reflective Overcoats A94-096
Overview of Technical Challenges of Re-Entry Analysis of Radioisotope Heat Sources A94-095
Ablation Response Testing of Simulated Radioisotope Power Supplies A94-071
Trajectory-Based Heating Analysis for the European Space Agency/Rosetta Earth Return Vehicle A94-061
Multiblock Analysis for Shuttle Orbiter Re-entry Heating from Mach 24 to Mach 12 A94-054
Particle Simulation of Rarefied Aeropass Maneuvers of the Magellan Spacecraft A94-002
Characteristics of the Shuttle Orbiter Leeside Flow During a Re-Entry Condition A94-001

Boiling/Condensation

Method of Filling Screen Liquid Acquisition Devices in Low Gravity A94-171
Measurements of Jet-Induced Pressure Decay in a Thermally Stratified Tank A94-042

Computational Heat Transfer

Approximate Viscous Shock Layer Technique for Calculating Hypersonic Flows About Blunt-Nosed Bodies A94-093
Approximate Method for Calculating Heating Rates on Three-Dimensional Vehicles A94-052

Cryogenics

Method of Filling Screen Liquid Acquisition Devices in Low Gravity A94-171

Forced Convection

Basic Aerodynamic and Heat Transfer Studies for Spacecraft Boosters in Prelaunch Conditions A94-088
Ablation Response Testing of Simulated Radioisotope Power Supplies A94-071

Heat Pipes

Effect of Transverse Vibration on the Performance of a Heat Pipe A94-140

Melting/Solidification

Consort 3 Results A94-005

Natural Convection

Three-Dimensional Numerical Investigation of Gravitational and Solutal Effects in a Cylindrical Cell A94-044

Thermal Control

TOPEX Microwave Radiometer Thermal Control: Post-System-Test Modifications and On-Orbit Performance A94-165
Thermal Modeling of Shuttle Solid Rocket Motors on the Launch Pad A94-034

Thermal Modeling and Analysis

TOPEX Microwave Radiometer Thermal Control: Post-System-Test Modifications and On-Orbit Performance A94-165
Particle Simulation of Rarefied Aeropass Maneuvers of the Magellan Spacecraft A94-002

Thermophysical Properties

Cercignani-Lampis-Lord Gas-Surface Interaction Model: Comparisons Between Theory and Simulation A94-080

Chronological Index

A94-001 Characteristics of the Shuttle Orbiter Leeside Flow During a Re-Entry Condition. William L. Kleb and K. James Weilmuenster, *NASA Langley Research Center* (**31**, 1, p. 8) Article based on AIAA Paper 92-2951

A94-002 Particle Simulation of Rarefied Aeropass Maneuvers of the Magellan Spacecraft. Brian L. Haas, *Eloret Institute*; and William J. Feiereisen, *NASA Ames Research Center* (**31**, 1, p. 17) Article

A94-003 Monte Carlo Simulation of a Near-Continuum Shock-Shock Interaction Problem. Ann B. Carlson and Richard G. Wilmoth, *NASA Langley Research Center* (**31**, 1, p. 25) Article based on AIAA Paper 92-2862

A94-004 Technology and Staging Effects on Two-Stage-to-Orbit Systems. Alan W. Wilhite, Walter C. Engelund, Douglas O. Stanley, J. Christopher Naftel, Roger A. Lepsch, Lance B. Bush, and Kathryn E. Wurster, *NASA Langley Research Center* (**31**, 1, p. 31) Article

A94-005 Consort 3 Results. Francis C. Wessling, *University of Alabama in Huntsville*; and George W. Maybee, *McDonnell Douglas Aerospace* (**31**, 1, p. 39) Article

A94-006 Estimation of the Low-Earth-Orbit Debris Population and Distribution. Kyle T. Alfriend and D. Laurie Lewis, *General Research Corporation* (**31**, 1, p. 48) Article

A94-007 Electrical Breakdown Currents on Large Spacecraft in Low Earth Orbit. Jason A. Vaughn and Melvin R. Carruth Jr., *NASA Marshall Space Flight Center*; and Ira Katz, Myron J. Mandell, and Gary A. Jongeward, *Maxwell Laboratories Inc.* (**31**, 1, p. 54) Article based on AIAA Paper 92-0822

A94-008 Mars Transfer Vehicle Using Regolith as Propellant. Brian Tillotson, *Boeing Defense and Space Group* (**31**, 1, p. 60) Article based on AIAA Paper 92-3449

A94-009 Semiactive Vibration Suppression of Truss Structures by Coulomb Friction. Junjiro Onoda and Kenji Minesugi, *Institute of Space and Astronautical Science, Japan* (**31**, 1, p. 67) Article based on AIAA Paper 92-2270 CP922

A94-010 Bandwidth Compression of the Digitized High-Definition Television Images for Transmission via Satellites. A. K. Al-Asmari, *King Saud University, Saudia Arabia*; and S. C. Kwatra, *University of Toledo* (**31**, 1, p. 75) Article based on AIAA Paper 92-2032

A94-011 Probabilistic Crack Growth Model for Application to Composite Solid Propellants. C. T. Liu, *Phillips Laboratory*; and J. N. Yang, *University of California, Irvine* (**31**, 1, p. 79) Article

A94-012 Drag Reduction for Turbulent Flow over a Projectile: Part I. Jan-Kuang Fu, *Chinese Air Force Academy, Taiwan, ROC*; and Shen-Min Liang, *National Cheng Kung University, Taiwan, ROC* (**31**, 1, p. 85) Article

A94-013 Drag Reduction for Turbulent Flow Over a Projectile: Part II. Shen-Min Liang, *National Cheng Kung University, Taiwan, ROC*; and Jan-Kuang Fu, *Chinese Air Force Academy, Taiwan, ROC* (**31**, 1, p. 93) Article

A94-014 Modeling Radiation Forces Acting on Topex/Poseidon for Precision Orbit Determination. J. Andrew Marshall, *NASA Goddard Space Flight Center*; and Scott B. Luthcke, *Hughes STX* (**31**, 1, p. 99) Article
Errata (**31**, 3, p. 535)

A94-015 Three-Dimensional Flow Calculations for a Projectile with Standard and Dome Bases. Jubaraj Sahu and Charles J. Nietubicz, *U. S. Army Research Laboratory* (**31**, 1, p. 106) Article

A94-016 Effects of the Roll Angle on Cruciform Wing-Body Configurations at High Incidences. J. Meyer, *Technion—Israel Institute of Technology* (**31**, 1, p. 113) Article based on AIAA Paper 92-3456 CP929

A94-017 Supersonic Flow in the Second-Throat Ejector-Diffuser System. Falin Chen, C. F. Liu, and J. Y. Yang, *National Taiwan University, Taiwan, ROC* (**31**, 1, p. 123) Article

A94-018 Simplified Method for Evaluating the Flight Stability of Liquid-Filled Projectiles. Daniel J. Weber, *U.S. Army Edgewood Research, Development, and Engineering Center* (**31**, 1, p. 130) Article based on AIAA Paper 92-0650

A94-019 Mechanism Synthesis and Two-Dimensional Control Designs of an Active Three-Cable Crane. Li-Farn Yang and Martin M. Mikulas Jr., *University of Colorado* (**31** , 1, p. 135) Article

A94-020 Reliability Consideration of Thin-Film Temperature Sensors in Future Space Shuttle Propulsion Systems. Hsien-Lu Huang, *Rockwell Space Operations Company* (**31**, 1, p. 145) Article based on AIAA Paper 91-2262

A94-021 Engineering Code for Hypersonic Vehicle Optimization. Richard A. Thompson and Christopher J. Riley, *NASA Langley Research Center* (**31**, 1, p. 150) Engineering Note

A94-022 Analysis of Environmentally Induced Spacecraft Anomalies. A. L. Vampola, *The Aerospace Corporation* (**31**, 2, p. 154) Article

A94-023 National Oceanic and Atmospheric Administration's Spacecraft Anomaly Data Base and Examples of Solar Activity Affecting Spacecraft. Daniel C. Wilkinson, *National Oceanic and Atmospheric Administration* (**31**, 2, p. 160) Article based on AIAA Paper 90-0173

A94-024 Anomalies due to Single Event Upsets. P. Robinson, W. Lee, R. Aguero, and S. Gabriel, *Jet Propulsion Laboratory, California Institute of Technology* (**31**, 2, p. 166) Article

A94-025 NASA/National Space Science Data Center Trapped Radiation Models. John D. Gaffey Jr. and Dieter Bilitza, *Hughes STX* (**31**, 2, p. 172) Article

A94-026 Spacecraft Environmental Anomalies Expert System. Harry C. Koons and David J. Gorney, *The Aerospace Corporation* (**31**, 2, p. 177) Article

A94-027 On-Line Spacecraft Environment Interactions Information System. Michael Lauriente, *NASA Goddard Space Flight Center* (**31**, 2, p. 182) Article based on AIAA Paper 90-0171

A94-028 Applications of Computational Fluid Dynamics to the Aerodynamics of Army Projectiles. Walter B. Sturek, Charles J. Nietubicz, Jubaraj Sahu, and Paul Weinacht, *U.S. Army Research Laboratory* (**31**, 2, p. 186) Article

A94-029 Determination of Slender Body Aerodynamics Using Discrete Vortex Methods. G. A. Gebert, *Utah State University* (**31**, 2, p. 200) Article

A94-030 Investigation of the Flow past the ARIANE 5 Launcher Afterbody. Philippe Reijasse and Jean Délery, *Office National d'Etudes et de Recherches Aérospatiales, France* (**31**, 2, p. 208) Article based on AIAA Paper 91-2897 CP916

A94-031 Navier-Stokes Solver for Hypersonic Flow over a Slender Cone. Chang-Sheng Tai, *Chung Cheng Institute of Technology, Taiwan, ROC*; and Ar-Fu Kao, *Armour Research and Development Center, Taiwan, ROC* (**31**, 2, p. 215) Article

A94-032 Effects of Gas Models on Hypersonic Base Flow Calculations. M. S. Kim, J. M. Loellbach, and K. D. Lee, *University of Illinois* (**31**, 2, p. 223) Article

A94-033 NASP Vehicle Interactions and Signatures above 100 Kilometers. B. David Green, Girard A. Simons, and Mark E. Fraser, *Physical Sciences, Inc.*; and Daniel Hastings, *Massachusetts Institute of Technology* (**31**, 2, p. 231) Article

A94-034 Thermal Modeling of Shuttle Solid Rocket Motors on the Launch Pad. E. C. Mathias and R. A. Ahmad, *Thiokol Corporation* (**31**, 2, p. 237) Article

A94-035 Control Strategies for Space Boosters Using Air Collection Systems. H. G. Kauffman, R. V. Grandhi, W. L. Hankey, and P. J. Belcher, *Wright State University* (**31**, 2, p. 243) Article based on AIAA Paper 91-0472

A94-036 Monte Carlo Simulation of Launch Site Winds at Kennedy Space Center. Eric M. Queen, *NASA Langley Research Center*; Michael S. Warner, *George Washington University*; and Daniel D. Moerder, *NASA Langley Research Center* (**31**, 2, p. 249) Article

A94-037 Calculations of Low-Reynolds-Number Resistojet Nozzles. Suk C. Kim, *Sverdrup Technology, Inc.* (**31**, 2, p. 259) Article

A94-038 Simplified Model for Calculation of Backflow Contamination from Rocket Exhausts in Vacuum. Rhonald M. Jenkins, Alessandro Ciucci, and John E. Cochran Jr., *Auburn University* (**31**, 2, p. 265) Article based on AIAA Paper 90-1846

A94-039 Particle Simulations of Helium Microthruster Flows. Iain D. Boyd, *Eloret Institute*; Yusuf Jafry, *Stanford University*; and Jeff Vanden Beukel, *Lockheed Missiles and Space Company* (**31**, 2, p. 271) Article

A94-040 Analysis of Multifastener Composite Joints. O. H. Griffin Jr. and M. W. Hyer, *Virginia Polytechnic Institute and State University*; D. Cohen, *Hercules Aerospace Company*; M. J. Shuart, *NASA Langley Research Center*; S. R. Yalamanchili, *General Motors Truck Engineering*; and C. B. Prasad, *Analytical Services and Materials, Inc.* (**31**, 2, p. 278) Article

A94-041 Propellant Stress Relief Groove for the Titan IV Solid Rocket Motor Upgrade. I-Shih Chang, *The Aerospace Corporation* (**31**, 2, p. 285) Article

A94-042 Measurements of Jet-Induced Pressure Decay in a Thermally Stratified Tank. Ogden S. Jones, Jere S. Meserole, and Anthony Fortini, *Boeing Defense & Space Group* (**31**, 2, p. 290) Article

A94-043 Bayesian Formulation of the Best of Liquid and Solid Reliability Methodology. W. R. Blischke, *University of Southern California* (**31**, 2, p. 297) Article

A94-044 Three-Dimensional Numerical Investigation of Gravitational and Solutal Effects in a Cylindrical Cell. N. Ramachandran, *Universities Space Research Association*; and James Patton Downey, *NASA Marshall Space Flight Center* (**31**, 2, p. 304) Article based on AIAA Paper 91-1332
Errata (**31**, 4, p. 712)

A94-045 Object-Oriented, Optimization-Based Design of Satellite Structures. Srinivas Kodiyalam, Catherine M. Graichen, Isobel J. Connell, and Peter M. Finnigan, *General Electric Corporate Research and Development Center* (**31**, 2, p. 312) Article

A94-046 Foam Fractionation of Particles in Low Gravity. David A. Noever, *NASA Marshall Space Flight Center* (**31**, 2, p. 319) Article

A94-047 Role of Criteria in Design and Management of Space Systems. James C. Blair and Robert S. Ryan, *NASA Marshall Space Flight Center* (**31**, 2, p. 323) Article based on AIAA Paper 92-1585

A94-048 International Space University Variable Gravity Research Facility Design. Sheila G. Bailey, Francis P. Chiaramonte, and Kenneth J. Davidian, *NASA Lewis Research Center* (**31**, 2, p. 330) Article

A94-049 Hypersonic Fin Aerodynamics. R.-J. Yang, *Rockwell International* (**31**, 2, p. 339) Engineering Note

A94-050 Columbus: To Mars with Solar-Electric Propulsion. James A. Martin and Ricky A. Wallace, *University of Alabama* (**31**, 2, p. 341) Engineering Note

A94-051 Deployed High-Temperature Superconducting Coil Magnetic Shield. Erik J. Hilinski and F. Hadley Cocks, *Duke University* (**31**, 2, p. 342) Engineering Note

A94-052 Approximate Method for Calculating Heating Rates on Three-Dimensional Vehicles. H. Harris Hamilton II and Francis A. Greene, *NASA Langley Research Center*; and F. R. DeJarnette, *North Carolina State University* (**31**, 3, p. 345) Article based on AIAA Paper 93-2881

A94-053 Navier-Stokes Simulations of Orbiter Aerodynamic Characteristics Including Pitch Trim and Bodyflap. K. James Weilmuenster, Peter A. Gnoffo, and Francis A. Greene, *NASA Langley Research Center* (**31**, 3, p. 355) Article

A94-054 Multiblock Analysis for Shuttle Orbiter Re-Entry Heating from Mach 24 to Mach 12. Peter A. Gnoffo and K. James Weilmuenster, *NASA Langley Research Center*; and Stephen J. Alter, *Lockheed Engineering and Sciences Company* (**31**, 3, p. 367) Article

A94-055 Aerodynamically Blunt and Sharp Bodies. W. H. Mason and Jaewoo Lee, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 378) Article based on AIAA Paper 92-2727

A94-056 Navier-Stokes Computation of a Viscous Optimized Waverider. Naruhisa Takashima and Mark J. Lewis, *University of Maryland* (**31**, 3, p. 383) Article

A94-057 Hypersonic Waverider Test Vehicle: A Logical Next Step. Douglas J. Tincher, *Science Applications International Corporation*; and David W. Burnett, *McDonnell Douglas Aerospace* (**31**, 3, p. 392) Article based on AIAA Paper 92-0308

A94-058 Development of an Efficient Inverse Method for Supersonic and Hypersonic Body Design. Jaewoo Lee and W. H. Mason, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 400) Article based on AIAA Paper 91-0395

A94-059 Minimum-Drag Axisymmetric Bodies in the Supersonic/Hypersonic Flow Regimes. W. H. Mason and Jaewoo Lee, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 406) Article based on AIAA Paper 90-3072

A94-060 Propulsion Requirements for Reusable Single-Stage-to-Orbit Rocket Vehicles. Douglas O. Stanley, Walter C. Engelund, and Roger Lepsch, *NASA Langley Research Center* (**31**, 3, p. 414) Article based on AIAA Paper 92-3504

A94-061 Trajectory-Based Heating Analysis for the European Space Agency/Rosetta Earth Return Vehicle. William D. Henline and Michael E. Tauber, *NASA Ames Research Center* (**31**, 3, p. 421) Article

A94-062 Lip Leakage Flow Simulation for the Gravity Probe B Gas Spinup. Leonardo Dagum, *Computer Sciences Corporation* (**31**, 3, p. 429) Article based on AIAA Paper 92-0559

A94-063 Solid Rocket Exhaust in the Stratosphere: Plume Diffusion and Chemical Reactions. M. Richard Denison, John J. Lamb, William D. Bjorndahl, Eric Y. Wong, and Peter D. Lohn, *TRW, Inc.* (**31**, 3, p. 435) Article

A94-064 Physiological Constraints on Deceleration During the Aerocapture of Manned Vehicles. J. E. Lyne, *University of Tennessee* (**31**, 3, p. 443) Article

A94-065 Optimization of Spacecraft Orbit and Shielding for Radiation Dose. Michele M. Gates and Mark J. Lewis, *University of Maryland at College Park* (**31**, 3, p. 447) Article

A94-066 Feasibility Study of Inflatable Structures for a Lunar Base. Paul S. Nowak, Willy Z. Sadeh, and Jeffrey Janakus, *Colorado State University* (**31**, 3, p. 453) Article based on AIAA Paper 92-1031

A94-067 Lunar Missions Using Advanced Chemical Propulsion: System Design Issues. Bryan Palaszewski, *NASA Lewis Research Center* (**31**, 3, p. 458) Article

A94-068 Probabilistic Progressive Buckling of Trusses. Shantaram S. Pai and Christos C. Chamis, *NASA Lewis Research Center* (**31**, 3, p. 466) Article based on AIAA Paper 91-0916 CP911

A94-069 Intelsat Solar Array Coupon Atomic Oxygen Flight Experiment. S. Koontz and G. King, *NASA Johnson Space Center*; A. Dunnet, *International Telecommunications Satellite Organization*; T. Kirkendahl, *Communications Satellite Corporation*; and R. Linton and J. Vaughn, *NASA Marshall Space Flight Center* (**31**, 3, p. 475) Article

A94-070 Solar Pressure Disturbance on GSTAR and SPACENET Satellites. S. A. Parvez, *GTE Spacenet Corporation* (**31**, 3, p. 482) Article

A94-071 Ablation Response Testing of Simulated Radioisotope Power Supplies. Steven A. Lutz and Chris C. Chan, *Johns Hopkins University Applied Physics Laboratory* (**31**, 3, p. 489) Article based on AIAA Paper 93-0381

A94-072 Arcing of Negatively Biased Solar Cells in a Plasma Environment. B. L. Upschulte, W. J. Marinelli, and K. L. Carleton, *Physical Sciences, Inc.*; G. Weyl, *Network Physics*; E. Aifer, *Boston University*; and D. E. Hastings, *Massachusetts Institute of Technology* (**31**, 3, p. 493) Article

A94-073 Ascent Wind Model for Launch Vehicle Design. S. I. Adelfang, O. E. Smith, and G. W. Batts, *New Technology, Inc.* (**31**, 3, p. 502) Article

A94-074 Dynamics of a Space Module Impacting Water. J. R. Brooks and L. A. Anderson, *University of Central Florida* (**31**, 3, p. 509) Article

A94-075 Aerothermodynamic Methods for a Mars Environmental Survey Mars Entry. R. A. Mitcheltree, *NASA Langley Research Center* (**31**, 3, p. 516) Article based on AIAA Paper 93-2761

A94-076 Managing Single Event Effects in Satellite Systems. Richard H. Maurer and James D. Kinnison, *Johns Hopkins University Applied Physics Laboratory* (**31**, 3, p. 524) Engineering Note

A94-077 Perturbed Volume of Orbiting Debris. Joshua Ashenberg (**31**, 3, p. 526) Engineering Note

A94-078 Broadband Radio-Frequency Spectrum from Electrostatic Discharges on Spacecraft. H. C. Koons, *The Aerospace Corporation*; and T. S. Chin, *Lockheed Missiles & Space Company, Inc.* (**31**, 3, p. 528) Engineering Note

A94-079 Plasma Chamber Testing of Advanced Photovoltaic Solar Array Coupons. G. Barry Hillard, *NASA Lewis Research Center* (**31**, 3, p. 530) Engineering Note

A94-080 Cercignani-Lampis-Lord Gas-Surface Interaction Model: Comparisons Between Theory and Simulation. Michael S. Woronowicz, *ViGYAN, Inc.*; and D. F. G. Rault, *NASA Langley Research Center* (**31**, 3, p. 532) Engineering Note

A94-081 Aerodynamic Characteristics of the Magellan Spacecraft in the Venus Upper Atmosphere. Didier F. G. Rault, *NASA Langley Research Center* (**31**, 4, p. 537) Article based on AIAA Paper 93-0723

A94-082 Abort Options for Potential Mars Missions. Paul V. Tartabini, Scott A. Striepe, and Richard W. Powell, *NASA Langley Research Center* (**31**, 4, p. 543) Article

A94-083 Rarefield-Flow Shuttle Aerodynamics Flight Model. Robert C. Blanchard, *NASA Langley Research Center*; and Kevin T. Larman and Christina D. Moats, *Lockheed Engineering and Sciences Company* (**31**, 4, p. 550) Article based on AIAA Paper 93-3441

A94-084 Long-Term Variability of Electron Radiation Dose in Geosynchronous Orbit. H. C. Koons, D. J. Gorney, and J. B. Blake, *The Aerospace Corporation* (**31**, 4, p. 557) Article

A94-085 Shuttle Upper Atmosphere Mass Spectrometer Experimental Flight Results. Robert C. Blanchard, *NASA Langley Research Center*; and Thomas A. Ozoroski and John Y. Nicholson, *ViGYAN, Inc.* (**31**, 4, p. 562) Article

A94-086 Neutral Buoyancy Evaluation of Extravehicular Activity Assembly of a Large Precision Reflector. Walter L. Heard Jr. and Mark S. Lake, *NASA Langley Research Center* (**31**, 4, p. 569) Article

A94-087 Visual Photometric Experiment: A Getaway Special Payload Aboard STS-042. Paul D. LeVan, *U.S. Air Force Philips Laboratory* (**31**, 4, p. 578) Article

A94-088 Basic Aerodynamic and Heat Transfer Studies for Spacecraft Boosters in Prelaunch Conditions. L. Scott Miller, *Wichita State University* (**31**, 4, p. 585) Article

A94-089 Hypersonic Interceptor Aero-Optics Performance Predictions. George W. Sutton, John E. Pond, Ronald Snow, and Yanfang Hwang, *Aero Thermo Technology, Inc.* (**31**, 4, p. 592) Article based on AIAA Paper 93-2675

A94-090 Euler and Navier-Stokes Solutions for Supersonic Flow Around a Complex Missile. Th. Streit, *DLR, German Aerospace Research Establishment, Germany* (**31**, 4, p. 600) Article

A94-091 Integrated Inlets for Cone-Derived Waveriders with Combined Transverse and Longitudinal Curvature. Sheam-Chyun Lin and Yu-Shan Luo, *National Taiwan Institute of Technology* (**31**, 4, p. 609) Article

A94-092 Computation of the Roll Moment for a Projectile with Wrap-Around Fins. Harris L. Edge, *U.S. Army Research Laboratory* (**31**, 4, p. 615) Article based on AIAA Paper 93-0499

A94-093 Approximate Viscous Shock Layer Technique for Calculating Hypersonic Flows About Blunt-Nosed Bodies. F. McNeil Cheatwood, *ViGYAN, Inc.*; and F. R. DeJarnette, *North Carolina State University* (**31**, 4, p. 621) Article

A94-094 Computation of Unsteady Flow past an Oscillating Cylinder near a Vertical Wall. Guan-Wei Yen and Oktay Baysal, *Old Dominion University* (**31**, 4, p. 630) Article based on AIAA Paper 92-4653

A94-095 Overview of Technical Challenges of Re-Entry Analysis of Radioisotope Heat Sources. E. F. Lucero, *The Johns Hopkins University* (**31**, 4, p. 636) Article based on AIAA Paper 93-0379

A94-096 Radiation Control with Selectively Reflective Overcoats. Susan M. White, *NASA Ames Research Center* (**31**, 4, p. 642) Article based on AIAA Paper 91-1320

A94-097 Monte Carlo Simulation for Backscatter of Outgassing Molecules from Simple Spacecraft Surfaces. Chien Fan, Clifford Gee, and Michael C. Fong, *Lockheed Missile and Space Company* (**31**, 4, p. 649) Article based on AIAA Paper 93-2867

A94-098 Atomic-Oxygen Undercutting of Long Duration Exposure Facility Aluminized-Kapton Multilayer Insulation. Kim K. de Groh and Bruce A. Banks, *NASA Lewis Research Center* (**31**, 4, p. 656) Article

A94-099 Shape of Space Debris as Estimated from Radar Cross Section Variations. Toru Sato, Toshio Wakayama, and Takeshi Tanaka, *Kyoto University, Japan*; Ken-ichiro Ikeda, *University of Tokyo, Japan*; and Iwane Kimura, *Kyoto University, Japan* (**31**, 4, p. 665) Article

A94-100 Optical Properties of Orbital Debris. Karl G. Henize and Christine A. O'Neill, *NASA Johnson Space Center*; and Mark K. Mulrooney and Phillip Anz-Meador, *Lockheed Engineering and Sciences Company* (**31**, 4, p. 671) Article based on AIAA Paper 93-0162

A94-101 Jimsphere and Radar Wind Profiler Turbulence Indicators. Michael Susko, *NASA George C. Marshall Space Flight Center* (**31**, 4, p. 678) Article

A94-102 Arc Mitigation on High Voltage Solar Arrays. Renee Mong and Daniel E. Hastings, *Massachusetts Institute of Technology* (**31**, 4, p. 684) Article

A94-103 Gasdynamic Approach to Small Plumes Computation. L. Genkin and M. Baer, *Soreq NRC, Israel*; and J. Falcovitz, *Technion—Israel Institute of Technology* (**31**, 4, p. 691) Article

A94-104 Effects of Space Exposure on Pyroelectric Infrared Detectors. James B. Robertson, *NASA Langley Research Center* (**31**, 4, p. 701) Engineering Note

A94-105 Mars Aerocapture: Extension and Refinement. P. F. Wercinski, *NASA Ames Research Center*; and J. E. Lyne, *University of Tennessee* (**31**, 4, p. 703) Engineering Note

A94-106 Wing Effects on Missile Asymmetric Vortex Behavior. R. M. Howard, M. H. Lung, J. J. Viniotis, D. A. Johnson, and J. A. Pinaire, *Naval Postgraduate School* (**31**, 4, p. 705) Engineering Note

A94-107 Nuclear Explosive Propelled Interceptor for Deflecting Objects on Collision Course with Earth. Johndale C. Solem, *Los Alamos National Laboratory* (**31**, 4, p. 707) Engineering Note

A94-108 Modeling the Short-Term Evolution of Orbital Debris Clouds in Circular Orbits. R. Crowther, *Defense Research Agency Farnborough, England, UK* (**31**, 4, p. 709) Engineering Note

A94-109 Hypersonic Rarefied Flow past Spheres Including Wake Structure. Virendra K. Dogra, *ViGYAN, Inc.*; and James N. Moss, Richard G. Wilmoth, and Joseph M. Price, *NASA Langley Research Center* (**31**, 5, p. 713) Article based on AIAA Paper 92-0495

A94-110 Aerodynamic Characteristics of a Hypersonic Viscous Optimized Waverider at High Altitudes. Didier F. G. Rault, *NASA Langley Research Center* (**31**, 5, p. 719) Article based on AIAA Paper 92-0306

A94-111 Hypersonic Nonequilibrium Navier-Stokes Solutions over an Ablating Graphite Nosetip. Y.-K. Chen and W. D. Henline, *NASA Ames Research Center* (**31**, 5, p. 728) Article based on AIAA Paper 93-2836

A94-112 Hypersonic Convective Heat Transfer over 140-deg Blunt Cones in Different Gasses. D. A. Stewart, *NASA Ames Research Center*; and Y. K. Chen, *Eloret Institute* (**31**, 5, p. 735) Article based on AIAA Paper 93-2787

A94-113 Application of the Multigrid Solution Technique to Hypersonic Entry Vehicles. Francis A. Greene, *NASA Langley Research Center* (**31**, 5, p. 744) Article

A94-114 Higher-Order Viscous Shock-Layer Solutions for High-Altitude Flows. Roop N. Gupta and Ernest V. Zoby, *NASA Langley Research Center*; and Sudheer N. Nayani and Kam-Pui Lee, *ViGYAN, Inc.* (**31**, 5, p. 751) Article based on AIAA Paper 93-2724

A94-115 Base Drag Prediction on Missile Configurations. F. G. Moore, *Naval Surface Warfare Center*; F. Wilcox, *NASA Langley Research Center*; and T. Hymer, *Naval Surface Warfare Center* (**31**, 5, p. 759) Article

A94-116 Aerodynamic Characteristics of a Canard-Controlled Missile at High Angles of Attack. Edmund H. Smith, *Naval Air Warfare Center*; and Sheshagiri K. Hebbar and Max F. Platzer, *Naval Postgraduate School* (**31**, 5, p. 766) Article based on AIAA Paper 93-0763

A94-117 Predicting Exhaust Plume Boundaries with Supersonic External Flows. Kyle L. Nash, *Mevatec Corporation*; and Kevin W. Whitaker and L Michael Freeman, *University of Alabama* (**31**, 5, p. 773) Article

A94-118 Three-Dimensional Structure of a Supersonic Jet Impinging on an Inclined Plate. Kyoung-Ho Kim and Keun-Shik Chang, *Korea Advanced Institute of Science and Technology* (**31**, 5, p. 778) Article

A94-119 An Improved Version of the Naval Surface Warfare Center Aeroprediction Code (AP93). F. G. Moore, T. Hymer, and R. McInville, *Naval Surface Warfare Center* (**31**, 5, p. 783) Article

A94-120 Rocket-Powered Single-Stage Vehicle Configuration Selection and Design. Douglas O. Stanley, Walter C. Engelund, Roger A. Lepsch, Mark McMillin, Kathryn E. Wurster, Richard W. Powell, Tony Guinta, and Resit Unal, *NASA Langley Research Center* (**31**, 5, p. 792) Article based on AIAA Paper 93-1053

A94-121 Uranus and Neptune Atmospheric-Entry Probe Study. M. Tauber, P. Wercinski, W. Henline, and J. Paterson, *NASA Ames Research Center*; and L. Yang, *Sterling Software* (**31**, 5, p. 799) Article based on AIAA Paper 93-3689

A94-122 Functional Dependence of Trajectory Dispersion on Inital Condition Errors . Robert A. LaFarge and Roy S. Baty, *Sandia National Laboratories* (**31**, 5, p. 806) Article

A94-123 Examining the Accuracy of Space Shuttle Support Loads Using Probabilistic Analysis Techniques. J. A. Richardson, *University of Alabama*; and J. S. Townsend, *NASA Marshall Space Flight Center* (**31**, 5, p. 814) Article based on AIAA Paper 93-1107

A94-124 Structural and Loads Analysis of a Two-Stage Reusable Manned Launch System. James C. Robinson, *Old Dominion University Research Foundation*; and Douglas O. Stanley, *NASA Langley Research Center* (**31**, 5, p. 821) Article based on AIAA Paper 92-4774

A94-125 Improved GPS Solar Radiation Pressure Modeling for Precise Orbit Determination . Yvonne Vigue, Stephen M. Lichten, Ron J. Muellerschoen, Geoff Blewitt, and Michael B. Heflin, *Jet Propulsion Laboratory, California Institute of Technology* (**31**, 5, p. 830) Article

A94-126 Fourth-Generation Mars Vehicle Concepts. Brent Sherwood, *Boeing Defense & Space Group* (**31**, 5, p. 834) Article based on AIAA Paper 93-1069

A94-127 Acceleration Mapping on Consort 5. Robert J. Naumann, *University of Alabama in Huntsville* (**31**, 5, p. 842) Article

A94-128 Commercial Experiment Transporter—COMET. Francis C. Wessling, *University of Alabama in Huntsville*; Michael Robinson, *University of Colorado—Boulder*; Ramiro S. Martinez, *Texas A&M University*; Thomas Gallimore, *University of Alabama at Birmingham*; and Nick Combs, *University of Houston* (**31**, 5, p. 846) Article

A94-129 Thermal Force Modeling for Global Positioning System Satellites Using the Finite Element Method. Yvonne Vigue, *Jet Propulsion Laboratory, California Institute of Technology*; and Bob E. Schutz and P. A. M. Abusali, *University of Texas at Austin* (**31**, 5, p. 855) Article based on AIAA Paper 91-188

A94-130 Effects of 69 Months in Low Earth Orbit on Kapton Antenna Structures. J. B. Whiteside, E. Kamykowski, W. D. Rooney, R. Schulte, and M. Stauber, *Grumman Research & Development Center* (**31**, 5, p. 860) Article

A94-131 Cadmium Simulation of Orbital-Debris Shield Performance to Scaled Velocities of 18km/s. Robert M. Schmidt and Kevin R. Housen, *Boeing Defense & Space Group*; and Andrew J. Piekutowski, and Kevin L. Poormon, *University of Dayton Research Institute* (**31**, 5, p. 866) Article

A94-132 Deployment Reliability Prediction for Large Satellite Antennas Driven by Spring Mechanisms. Masayoshi Misawa, *NTT Radio Communications Systems Laboratories, Japan* (**31**, 5, p. 878) Article

A94-133 On-Orbit Nonlinear Structural Parameters Realization via Artificial Neural Network. Rafael Gluck, *TRW Space and Technology Group*; and Han-Sen Dai and Walter J. Karplus, *University of California, Los Angeles* (**31**, 5, p. 883) Article

A94-134 Multibody-Plasma Interactions: Charging in the Wake. J. Wang, P. Leung, H. Garrett, and G. Murphy, *Jet Propulsion Laboratory, California Institute of Technology* (**31**, 5, p. 889) Article

A94-135 Effects of Satellite Bunching on the Probability of Collision in Geosynchronous Orbit. V. A. Chobotov and C. G. Johnson, *The Aerospace Corporation* (**31**, 5, p. 895) Article

A94-136 Midcourse Space Experiment: Introduction to the Spacecraft, Instruments, and Scientific Objectives. John D. Mill, *Environmental Research Institute of Michigan*; Robert R. O'Neil and Stephan Price, *U.S. Air Force Phillips Laboratory*; Gerald J. Romick and O. Manuel Uy, *Johns Hopkins University Applied Physics Laboratory*; E. M. Gaposchkin, *Massachusetts Institute of Technology*; Glenn C. Light, *The Aerospace Corporation*; W. Walding Moore Jr., *U.S. Army Space and Strategic Command*; Thomas L. Murdock, *General Research Corporation*; and A. T. Stair Jr., *Visidyne* (**31**, 5, p. 900) Article

A94-137 Solid-Propellant Grain Design by an Interface Reconstruction Scheme. F. Mashayek and N. Ashgriz, *State University of New York at Buffalo* (**31**, 5, p. 908) Engineering Note

A94-138 Measured Plasma Conductivity of Zinc-Oxide-Based Thermal Control Coatings. G. Barry Hillard, *NASA Lewis Research Center* (**31**, 5, p. 910) Engineering Note

A94-139 Launch Straregy Using Ground-Based Mass Drivers. Richard B. Peterson, *Oregon State University* (**31**, 5, p. 912) Engineering Note

A94-140 Effect of Transverse Vibration on the Performance of a Heat Pipe. Mark C. Charlton and W. Jerry Bowman, *Air Force Institute of Technology* (**31**, 5, p. 914) Engineering Note based on AIAA Paper 93-2734

A94-141 Dynamical Instability of the Aerogravity Assist Maneuver. Colin R. McInnes, *University of Glasgow, Scotland, United Kingdom* (**31**, 5, p. 916) Engineering Note

A94-142 Supersonic Axisymmetric Conical Flow Solutions for Different Ratios of Specific Heats. Bhavesh B. Patel, B. K. Hodge, and Keith Koenig, *Mississippi State University* (**31**, 5, p. 918) Engineering Note

A94-143 Removal of Orbital Debris from Low Earth Orbit by Laser-Generated Drag. Mengu Cho, *Kobe University, Japan* (**31**, 5, p. 920) Engineering Note

A94-144 Calculating the Number of Meteoroid Impacts onto a Gravity-Gradient-Stabilized Spacecraft. Michael D. Bjorkman, *Boeing Defense & Space Group* (**31**, 5, p. 922) Engineering Note

A94-145 Analytical Solution for Controls, Heats, and States of Flight Trajectories. Ahmed Z. Al-Garni, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (**31**, 5, p. 924) Engineering Note

A94-146 Computer Experiments on Arcing Processes as Observed in Ground Tests. Heinz Thiemann, *Arbeitsgruppe Weltraumforschung und -Technologie, Germany*; and Robert W. Schunk, *Utah State University* (**31**, 6, p. 929) Article

A94-147 Fluid Dynamics Within a Rotating Bioreactor in Space and Earth Environments. Yow-Min D. Tsao, *KRUG Life Sciences*; Ernest Boyd, *Mankato State University*; and David A. Wolf and Glenn Spaulding, *NASA Johnson Space Center* (**31**, 6, p. 937) Article

A94-148 Aerodynamics of the Shuttle Orbiter at High Altitudes. Didier F. G. Rault, *NASA Langley Research Center* (**31**, 6, p. 944) Article

A94-149 Near-Wake Structure for a Generic Configuration of Aeroassisted Space Transfer Vehicles. Virendra K. Dogra, *ViGYAN, Inc.*; and James N. Moss and Joseph M. Price, *NASA Langley Research Center* (**31**, 6, p. 953) Article

A94-150 Direct Simulation Monte Carlo Simulation of the Interaction Between Rarefied Free Jets. Leonardo Dagum, *NASA*

Ames Research Center; and S. Konrad Zhu, *Rockwell International Corporation* (**31**, 6, p. 960) Article

A94-151 Determination of Wall Boundary Conditions for High-Speed-Ratio Direct Simulation Monte Carlo Calculations. Frank G. Collins, *University of Tennessee Space Institute*; and E. C. Knox, *REMTECH, Inc.* (**31**, 6, p. 965) Article

A94-152 Zonally Decoupled Direct Simulation Monte Carlo Solutions of Hypersonic Blunt-Body Wake Flows. Richard G. Wilmoth, Robert A. Mitcheltree, and James N. Moss, *NASA Langley Research Center*; and Virendra K. Dogra, *ViGYAN, Inc.* (**31**, 6, p. 971) Article

A94-153 Simulated Rarefied Aerodynamics of the Magellan Spacecraft During Aerobraking. Brian L. Haas, *Thermosciences Institute*; and Durwin A. Schmitt, *Martin Marietta Astronautics Company* (**31**, 6, p. 980) Article based on AIAA Paper 93-3676 CP937

A94-154 Convective and Radiative Heat Transfer Analysis for the Fire II Forebody. Robert B. Greendyke, *ViGYAN, Inc.*; and Lin C. Hartung, *NASA Langley Research Center* (**31**, 6, p. 986) Article

A94-155 Thermal Response and Ablation Characteristics of Lightweight Ceramic Ablators. Huy K. Tran and Daniel J. Rasky, *NASA Ames Research Center*; and Lili Esfahani, *San Jose State University* (**31**, 6, p. 993) Article based on AIAA Paper 93-2790

A94-156 Wing Vertical Position Effects on Wing-Body Carry-over for Noncircular Missiles. Brian E. Est and H. F. Nelson, *University of Missouri–Rolla* (**31**, 6, p. 999) Article based on AIAA Paper 92-0078

A94-157 Aerodynamic Design of Pegasus: Concept to Flight with Computational Fluid Dynamics. Michael R. Mendenhall, Daniel J. Lesieutre, Steven C. Caruso, Marnix F. E. Dillenius, and Gary D. Kuhn, *Nielsen Engineering & Research, Inc.* (**31**, 6, p. 1007) Article

A94-158 Some Aspects of the Aerodynamics of Separating Strap-ons. K. K. Biswas and C. G. Krishnan, *Vikram Sarabhai Space Centre, India* (**31**, 6, p. 1016) Article

A94-159 Supersonic Near-Wake Afterbody Boattailing Effects on Axisymmetric Bodies. J. L. Herrin and J. C. Dutton, *University of Illinois at Urbana–Champaign* (**31**, 6, p. 1021) Article based on AIAA Paper 94-0029

A94-160 Fast Missions to Pluto Using Jupiter Gravity-Assist and Small Launch Vehicles. Michael A. Minovitch, *Phaser Telepropulsion, Inc.* (**31**, 6, p. 1029) Article

A94-161 Application of Probabilistic Analysis and Design Methods in Space Programs. R. S. Ryan and J. S. Townsend, *NASA Marshall Space Flight Center* (**31**, 6, p. 1038) Article based on AIAA Paper 93-1381 CP931

A94-162 Formulas for the Phase Characteristics in the Problem of Low-Earth-Orbital Debris. Joshua Ashenberg (**31**, 6, p. 1044) Article

A94-163 First-Order Reliability Application and Verification Methods for Semistatic Structures. V. Verderaime, *NASA Marshall Space Flight Center* (**31**, 6, p. 1050) Article

A94-164 Space Shuttle Main Engine Sensor Modeling Using Radial-Basis-Function Neural Networks. Kevin R. Wheeler and Atam P. Dhawan, *University of Cincinnati*; and Claudia M. Meyer, *Sverdrup Technology, Inc.* (**31**, 6, p. 1054) Article

A94-165 TOPEX Microwave Radiometer Thermal Control: Post-System-Test Modifications and On-Orbit Performance. Edward I. Lin, *Jet Propulsion Laboratory, California Institute of Technology* (**31**, 6, p. 1061) Article based on AIAA Paper 93-2743

A94-166 TRANSYS—Space Transportation System Preliminary Design Software. Dieter M. Wolf, *DLR, German Aerospace Research Establishment* (**31**, 6, p. 1067) Article based on AIAA Paper 92-1193

A94-167 Safety Index Approach to Predicting the Storage Life of Rocket Motors. I. Janajreh, R. A. Heller, and S. Thangjitham, *Virginia Polytechnic Institute and State University* (**31**, 6, p. 1072) Article

A94-168 Interactions Between the Space Experiments with Particle Accelerators Plasma Contactor and the Ionosphere. I. Katz, *Maxwell Laboratories, Inc.*; J. N. Barfield, J. L. Burch, J. A. Marshall, and W. C. Gibson, *Southwest Research Institute*; T. Neubert, *University of Michigan*; W. T. Roberts, *NASA Marshall Space Flight Center*; W. W. L. Taylor, *Nichols Research Corporation*; and J. R. Beattie, *Hughes Research Laboratories* (**31**, 6, p. 1079) Article

A94-169 Precision Landing on Mars Using Imaging Penetrator Beacons. Dan G. Tuckness, *University of Texas at Arlington* (**31**, 6, p. 1085) Article

A94-170 Structural Design and Mitigation of Mirror Deformations in Lunar-Based Telescopes. Paul L. Luz, *NASA Marshall Space Flight Center* (**31**, 6, p. 1092) Article based on AIAA Paper 93-4776

A94-171 Method of Filling Screen Liquid Acquisition Devices in Low Gravity. E. DiStefano and E. C. Cady, *McDonnell Douglas Aerospace—West*; and R. H. Rangel, *University of California, Irvine* (**31**, 6, p. 1099) Article based on AIAA Paper 91-3540

A94-172 Effect of a Baffle on Slosh Waves Excited by Gravity-Gradient Acceleration in Microgravity. R. J. Hung and C. C. Lee, *University of Alabama in Hunstville* (**31**, 6, p. 1107) Article

A94-173 Design and Structural Analysis of Highly Mobile Space Suits and Gloves. John A. Main, Steven W. Peterson, and Alvin M. Strauss, *Vanderbilt University* (**31**, 6, p. 1115) Article

A94-174 Imaging Penetrator-Beacon Design for Mars. Dan G. Tuckness, *University of Texas at Arlington* (**31**, 6, p. 1123) Article
